

How to Measure for Sky Lantern Blinds

This is the measurement you need to take if you want the blind to **fit inside the sky lantern recess**. Measure the full width & height of the '**recessed**' area (**wall to wall**), as shown in the diagram below.

Tips:

- ✓ **use a steel metal tape measure or a measuring stick** for accuracy and measure in centimetres to the nearest millimetre.
- ✓ **measure in 3 places** for both 'width' and 'height' then use the smallest measurements for ordering. Always double check your measurements!
- ✓ **don't make any deductions** for 'recess' specified blinds because the factory will do that to ensure the blind fits perfectly.
- ✓ **Look out for any obstructions** and take their position into account if necessary.

IMPORTANT NOTE: We will make the blind size to the measurements specified by you on order, less any deductions as outlined on the product information tab.
